

RICHESSE™  
**Red Volume**  
No. 7 • No. 9

**High Molecule HA**  
**Low Molecule HA**

*Hyaluronic Acid Booster*

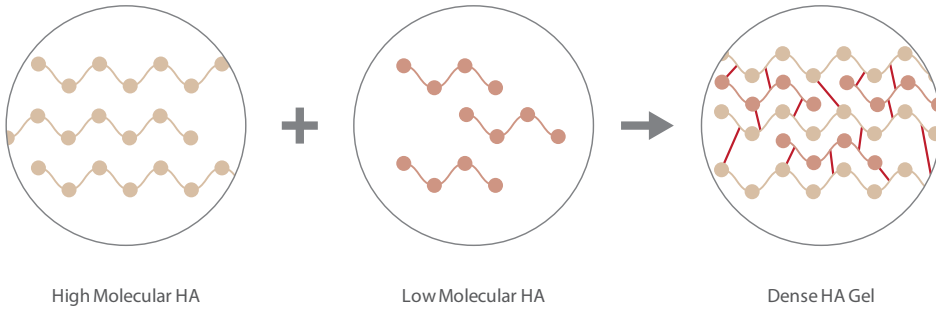

Lip Volumizer  
Lip Color Enhancer

# RICHESSE™ Red Volume No.7 • No.9

## HLD™ Technology

\*HLD™ : High and Low molecular high Density Technology

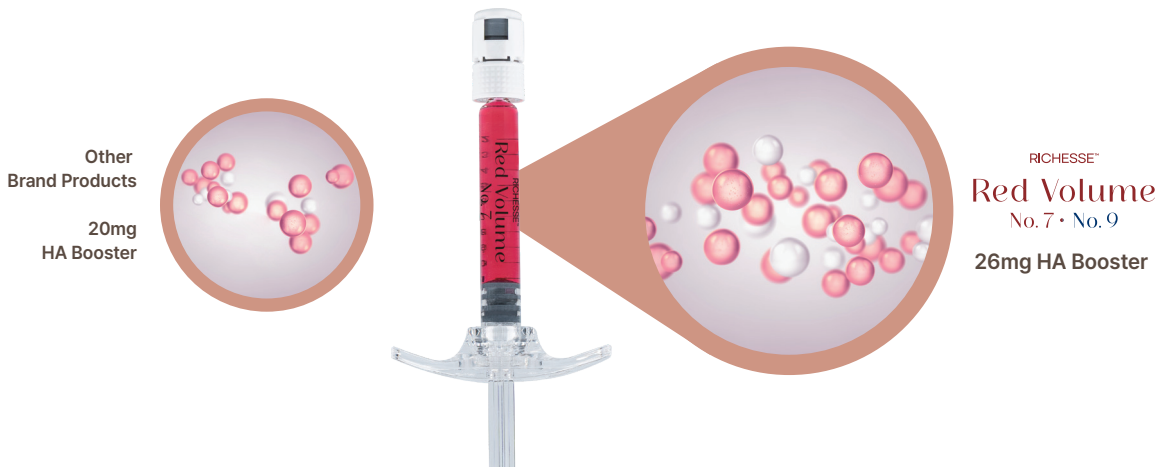

- Dense HA molecule by mixing high molecular weight HA and low molecular weight HA
- Low molecules are located between the high molecular weight HA, so it is possible to dense volumizing effect

---

## High Content Hyaluronic acid

- Lasts longer than low content Hyaluronic acid Booster
- Enables the treatment to be performed in the desired shape, resulting in a natural look and prevents migration after treatment
- Has high cohesion
- Overall, RICHESSE™ Red Volume No.7 is designed perfectly for lip injection

# RICHESSE™ Red Volume No.7 • No.9

## Long-lasting

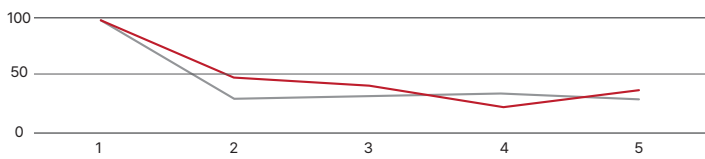

This specially designed product gives long-lasting volumizing effect.

Its excellent enzyme resistance gives slow degradation to the booster, with minimum sensitivity.

Treatment of Hyaluronidase to observe the tendency of gel to be decomposed

\* After 2 hours

— Red Volume No.7(26mg)

— SAVE(20mg)

Maintain properties (%) after 24 hours of hydrolysis treatment

## Before & After

## PRODUCT SUMMARY

Product Name	HA Concentration (mg/mL)	Gel type	Storage Modulus (G)
RICHESSE Red Volume No.7	26	Monophasic	100
RICHESSE Red Volume No.9	26	Monophasic	150
